Body composition, in alcoholic cirrhosis, and gender-related serum leptin levels, 115:947
Bone marrow transplantation, in Crohn's disease, 115:1035–c
Bone mineral density (BMD), in Crohn's disease, effect of exercise on, 115:36
Brain, hemisphere reorganization, after dysphagic stroke, 115:1039–tmig, 115:1104
Budesonide
for active Crohn's disease, comparison with prednisone, 115:807–tmig, 115:835
enema, for distal ulcerative colitis and proctitis, 115:525
Butyrate metabolism, in extensive ulcerative colitis, 115:584

Calcium signaling
along colonic crypt axis, acetylcholine-induced (rat), 115:1131
in enterochromaffin-like (ECL) cells, galanin and, 115:330
Camostate, inhibition of pancreatic enzymes, adaptation of pancreas to, 115:388
Cancer
gastric. *See* Gastric cancer
pancreatic. *See* Pancreatic cancer
Cancer prevention, approaches to, 115:523–ce
Carbon dioxide, and duodenal mucosal alkaline secretion in response to luminal acidity (rat), 115:680
Carcinogen metabolism, genetic polymorphisms in, and HNPCC, 115:1311–tmig, 115:1387
Cardiolipin, and hepatocyte adaptation to mitochondrial permeability transition (rat), 115:520–tmig, 115:693, 115:783–e
Case Reports
Acid secretion from an esophageal inlet patch demonstrated by ambulatory pH monitoring, 115:1574
Acute pancreatitis due to pyritinol: an immune-mediated phenomenon, 115:452
Drug-associated acute-onset vanishing bile duct and Stevens–Johnson syndromes in a child, 115:743
Multifocal neoplasia involving the colon and the appendix in ulcerative colitis: pathological and molecular features, 115:1566
Overexpression of an unstable intrinsic factor–cobalamin receptor in Imerslund–Gräsbeck syndrome, 115:173
Transjugular intrahepatic portosystemic shunt for bleeding angiodysplasia-like lesions in portal-hypertensive colopathy, 115:167
Treatment of fibrosing cholestatic hepatitis with lamivudine, 115:177
CD (cluster of differentiation)
CD28, in celiac disease, 115:519–tmig, 115:564
CD80, in celiac disease, 115:519–tmig, 115:564
CD86, in celiac disease, 115:519–tmig, 115:564
CD14, in Kupffer cell sensitization to endotoxin, 115:443, 115:494–e
Cecum
agenesis, 115:381, 115:487–e
organogenesis, 115:381, 115:487–e
Celiac disease
autoantibodies in, 115:1311–tmig, 115:1317–rc, 1584–e
ELISA for, 115:1311–tmig, 115:1317–rc, 115:1322, 115:1584–e
diagnosis of, 115:211–vidd gluten exposure in interferon γ production with, 115:519–tmig, 115:551
interleukin production with, 115:519–tmig, 115:551
tumor necrosis factor α production with, 115:519–tmig, 115:551
immunologic features of, CTLA-4 immunoglobulin and, 115:519–tmig, 115:564
pathogenesis of, 115:206–vidd screening for, 115:1311–tmig, 115:1317–rc, 115:1322, 115:1584–e
T-cell activation in, enzyme-modified wheat gliadin and, 115:809–gn
T lymphocytes in, 115:519–tmig, 115:564
unintentional gluten ingestion in, 115:243–c
Cell death, hepatocyte
mitochondrial permeability transition and (rat), 115:520–tmig, 115:693, 115:783–e
TNF-α–induced, glutathione and (mouse, rat), 115:1229
Cerebral cortex, response to acid exposure of esophageal mucosa, 115:1311–tmig, 115:1353
c-fos transcription, in brainstem, gastric acid-induced, vagal afferent signaling in (rat), 115:649
Charcot, Jean Martin, 115:541
Chest pain
noncardiac. *See* Noncardiac chest pain
unexplained, 115:222–e
Children
Behçet's syndrome in, gastrointestinal manifestations of, 115:1316–im
chronic hepatitis C in, pathological and clinical manifestations, 115:1525
Clostridium difficile diarrhea in, diagnosis of, 115:1329
Clostridium difficile toxins in, clinical significance of, 115:1329
drug-associated acute vanishing bile duct syndrome and Stevens-Johnson syndrome in, 115:743–cr
inflammatory bowel disease in diagnostic accuracy of serological assays in, 115:822

safety of azathioprine and 6-mercaptopurine in, 115:807–tmig, 115:813

Chloride transport, in pancreatic ducts, β-adrenergic control of (rat), 115:714

Cholecystokinin (CCK)
effects on esophagus, 115:520–tmig
effects on pancreas (rat), 115:520–tmig, 115:733

Cholecystokinin (CCK) receptors
CCK-A, extrasphincteric, and postprandial reflux, 115:520–tmig, 115:597
CCK-B/gastrin
and pancreatic amylase secretion, 115:808–tmig, 115:988
transgenic, and exocrine pancreatic secretion (mouse), 115:808–tmig, 115:988

Cholera toxin
diarrhea caused by, role of 5-hydroxytryptamine in (rat), 115:808–tmig, 115:883, 115:1009–e
prevention of mucosal T-cell staphylococcal enterotoxin B-induced anergy (mouse), 115:1197

Cholestasis
and hepatocyte adaptation to mitochondrial permeability transition (rat), 115:520–tmig, 115:693, 115:783–e
neonatal, monohydroxy bile acid-related (mouse), 115:1223

Cholesterol
cholelithiasis, in Chilean Hispanics, 115:937, 115:1012–e
dietary, and enterohepatic cycling of bilirubin (mouse, rat), 115:724

Cholesterol crystal-binding protein, biliary secretory IgA as, 115:129

Cholesterol 7α-hydroxylase, in bile acid synthesis (mouse), 115:1223

Cholic acid synthesis, from 27-hydroxycholesterol in humans, 115:509–c

Chromosome 3, in Crohn's disease, 115:1039–tmig, 115:1056, 115:1062, 115:1286–e

Chromosome 7, in Crohn's disease, 115:1039–tmig, 115:1056, 115:1062, 115:1286–e

Chromosome 12
in Crohn's disease, 115:1039–tmig, 115:1056, 115:1062, 115:1066, 115:1286–e
IBD2 on, in Crohn's disease, 115:1039–tmig, 115:1056, 115:1286–e

Chromosome 16
in Crohn's disease, 115:1039–tmig, 115:1056, 115:1062, 115:1066, 115:1286–e
IBD1 on, in Crohn's disease, 115:1039–tmig, 115:1056, 115:1286–e

Chronic idiopathic intestinal pseudo-obstruction (CIIP), pathogenesis, DNA viruses in, 115:498–ss

Ciprofloxacin, for ulcerative colitis, 115:1072, 115:1289–e

Cirrhosis
glucagon-stimulated glycogenolysis in, 115:1530
gluconeogenesis in, quantification of, 115:1530
leukocyte response to lipoxygenase products in, 115:147
portal-hypertensive bleeding in, propranolol plus prazosin or isosorbide-5-mononitrate combination therapy for, 115:116, 115:230–e
preascitic, renal renin-angiotensin in, 115:397, 115:489–e
primary biliary, autoantigen structure in, 115:139
sodium handling in, 115:397, 115:406, 115:489–e

c-*kit,* novel gain-of-function mutation in, 115:1090

Clarithromycin resistance, in *Helicobacter pylori,* 115:1272–vidd, 115:1278–vidd

Clostridium difficile
diarrhea, in children, diagnosis of, 115:1329
toxins, in children, clinical significance of, 115:1329

Colipase, gastric, in lipase-catalyzed fat digestion, 115:1040–tmig, 115:1179

Colitis
Fas ligand and perforin expression in (mouse), 115:849
lymphotoxin and TNF axes in, in two experimental models (mouse), 115:1312–tmig, 115:1464

Colon
G protein α subunits in, and azoxymethane-induced colonic neoplasms (rat), 115:1494
neoplasia, in ulcerative colitis, pathological and molecular features, 115:1566–cr
neoplasms, G protein α subunit expression in (rat), 115:1494
nitrergic innervation, regional differences in (rat), 115:1504

Colon cancer. *See also* Colorectal cancer
apobec-1 mRNA overexpression in, 115:1039–tmig, 115:1096
gastrin gene expression in, oncogenic *Ras*-induced, 115:1039–tmig, 115:1144
metastatic potential, galectin 3 and, 115:287
mortality, aspirin and, 115:514–c
prevention, aspirin and, 115:1036–c
protein kinase C isozymes and, 115:75, 115:225–e

Colonic crypts, acetylcholine-induced calcium signaling in (rat), 115:1131

Colonic permeability, and butyrate oxidation, in extensive ulcerative colitis, 115:584

Colonocytes
G protein α subunit expression in (rat), 115:1494
growth control/differentiation, PKC isozyme expression and, 115:75, 115:225–e

Colonoscopy
for colorectal cancer screening in families, 115:7
indications for, 115:519–tmig, 115:533, 115:777–e

Colopathy, portal-hypertensive, bleeding in, TIPS for, 115:167–cr

Colorectal adenomas
characteristics at first colonoscopy, predictive value, 115:13
characteristics at follow-up, predictors of, 115:13
in families of colorectal cancer patients, 115:7
recurrence, predictors of, 115:13

Colorectal cancer. *See also* Colon cancer
cells, proliferation, PPARγ activation inhibition of, 115:1049–rc, 115:1283–e
curative resection for, follow-up after, 115:248–c
DNA mismatch repair and, 115:789–ss
familial predisposition for, in ulcerative colitis, 115:1039–tmig, 115:1079
follow-up, 115:247–c, 115:248–c
gastrinemia and, 115:268
intraepithelial *Escherichia coli* and, 115:281
